ITHTHĀQALTUM

Dr. V. Abdur Rahim

An Exhaustive Study of Intricate & Lesser-Known, Phonetic & Morphological Changes in Qur'aanic Verbs & Nouns
Iththāqaltum deals with some of the lesser-known phonetic and morphological features of Arabic with special reference to their occurrence in the Glorious Qur’ān. There is copious material in Arabic dealing with such phonetic and morphological peculiarities, but very little in English. This book, it is hoped, will fill this gap insha’ Allah.

Dr. V. Abdur Rahim has been serving the cause of teaching Arabic to non-native speakers of Arabic for the past fifty years. In addition to his world-famous textbook known as Durūs al-Lughat al-‘Arabiyyah, he has published a number of Qur’ānic texts with lexical and grammatical notes. His latest book Iththāqaltum aims to help English-speaking students of Arabic understand some of the phonetic and morphological intricacies of the language of the Glorious Qur’ān.
